Gain Complete Business Visibility

Cloudwick is an AWS Advanced Consulting Partner focused on delivering actionable intelligence from all data. Our consultants will work with your organization to understand your business and technology requirements and will provide you with a build or buy artificial intelligence solution that meets your organizations data analytic requirements.

Working with CLoudwick your organization can now easily analyze any unstructured data stored by Docusign, Box, Google Drive, Dropbox, Call Center call platforms, video cameras and more.

We specialize in developing Amazon data lakes that can support rapid adoption for both custom built Amazon SageMaker AI and the integration and development of AI analytic pipelines using the following managed AI services offered by Amazon:
